AUTOMATED LABELING SYSTEMS

Pineberry integrates a variety of inkjet, camera/barcode readers and labeling technologies to full transports that include a feeder, vacuum conveyor and exit conveyor. Our labeling systems are used on track and trace applications, marking, date and lot coding, product labeling, personalization and custom applications.

We use a variety of labeling systems, as well as a full range of inkjet, which include CIJ, DOD and HP® technologies.
Features:

- Speeds up to 20,000 per hour
- In-Line Solution
- Extreme precision

Options:

- Product labeling and marking
- Variable information coding
- Feeding/Dispensing
- Vision camera and checker systems
- Conveyor line
- Print and apply available
- Inkjet printing
- Camera verification
- RFID
- Track and trace
- Vertical or horizontal applications
- Much, much more

Applications:

- Activation Labels
- Scratch Off Labels
- Price Stickers
- Bag/Product/Pouch/Carton Labels

Material Thickness:

- 10 mil—50 mil

Speeds:

- Up to 20,000 per hour

Power Requirements:

- 110V/220V 5amp
