

CARDCHECK CARD INSPECTION SYSTEM

The CardCheck Card Inspection System has true card edge-to-edge capabilities, offering quality guarantees and ensures unfailing card integrity on both the front and back of the card in one pass.

The two camera Card Inspection System detects print and surface defects of plastic cards, and eliminates bottlenecks that are caused by human inspectors, excess costs of false rejects and unnecessary labor time.

Features:

- Smallest footprint on the market
- Integrates into other personalization systems
- Speeds up to 36,000 per hour
- Two sided plastic card inspection
- Detects print and surface defects
- Reliable and easy to operate
- Eliminates bottlenecks

Material Sizes:

- CR 80 Cards
- Up to 5.5" wide
- *We can manufacture to accommodate
