Press Release

Pineberry Manufacturing Inc. to Instantly Print Packing Slips On Demand with No Start Up Time in Booth S3535 at ProMat, April 3-6, 2017

Pineberry Manufacturing Inc.'s InstaPrint prints, scans and inserts up to 200 pages per minute on demand, greatly reducing bottlenecks, labor costs and improving automated packing slip order fulfillment. InstaPrint can even fold packing slips for quick insertion into small boxes and cartons.

Toronto, ON, January 4, 2017 – Pineberry Manufacturing Inc. will be exhibiting at ProMat with the [InstaPrint Packing Slip Inserter](#). New to the Pineberry line of products, the InstaPrint uses a high quality drop-on-demand inkjet printer that has the ability to print on many flat materials, sizes and odd stocks, including paper, plastic and stock with an integrated label. With no consumables other than ink, the InstaPrint is cost efficient proving a quick ROI. Built with read and print software, packing slips are printed, folded and inserted into cartons at high speeds on demand; there is no need to scan down the line.

“This is a very robust, economical solution with a small footprint used to automate packing slip order fulfillment for the packaging and e-commerce industry,” states David McCharles, President of Pineberry Manufacturing Inc. “With an inkjet drop-on-demand printer and no printer duty cycle, if a rare jam occurs it can be cleared in seconds, unlike a laser printer, making the InstaPrint the most reliable packing slip insertion automated system on the market,” continues Mr. McCharles. “The InstaPrint is designed to increase capacity in distribution centers, reduce the number of packing stations, reduce bottlenecks and labor costs, and improves the overall order fulfillment process,” concludes Mr. McCharles.

With 100 percent print, fold and insert accuracy, the InstaPrint has a small footprint measuring 32.56 inches wide and 59.50 inches long. The InstaPrint comes with an attached Pineberry HSF 12 Friction Feeder, Drop-On-Demand Printer and a Pineberry Fold & Inserter on a vacuum conveyor that can be

easily integrated next to packaging lines for seamless packaging and order fulfillment. With an optional loader, the InstaPrint can hold up to 10,000 sheets. With an inkjet drop-on-demand print system, packing slips are scanned and printed in milliseconds for speedy order fulfillment. With an optional folding application, packing slips can be easily inserted into various sized cartons meeting multiple configuration requirements. Pineberry Manufacturing Inc. can enlarge the InstaPrint with affixing and collating packaging lines, making the InstaPrint flexible being altered according to job requirements.

About [ProMat](#)

ProMat (April 3-6, 2017 at Chicago's McCormick Place) is the largest expo for manufacturing and supply chain professionals in North America. ProMat provides attendees access to the latest material handling and logistics equipment and technologies. Over 850 exhibitors from industry, commerce and government will display their supply chain solutions and innovations on the 350,000 square foot show floor. Attendance at ProMat 2017 can make the difference between manufacturing and distribution operations stalling, surviving or even thriving during these challenging economic times.

About [Pineberry Manufacturing Inc.](#)

Since 1984, Pineberry Manufacturing Inc. has been developing high-quality friction feeding, printing, packaging and custom automation solutions for the plastic card, packaging, distribution, food and beverage, pharmaceutical, graphic arts, and mailing and fulfillment industries. Additionally, Pineberry specializes in integration, working with OEM's and providing customized solutions for the most demanding environments. Whether it is a standardized leaflet feeder, feeding and labeling bags, feeding cookies or an integrated custom solution, Pineberry has the expertise to provide exceptional products to make your project a success.
