Press Release

Pineberry Manufacturing Inc. to Showcase FlexPick Tray Denester for Food Packaging in Booth C-3704 at PACK EXPO Las Vegas, September 25 - 27, 2017

Pineberry Manufacturing Inc.'s FlexPick Tray Denesting Pick and Place Systems are easily integrated into existing lines.

Toronto, ON, June 29, 2017 – Pineberry Manufacturing Inc. will be exhibiting PACK EXPO Las Vegas with a FlexPick Tray Denesting Pick and Place System. The Pineberry Automated Tray Denester product line is manufactured for the food packing industries to automatically pick and place or dispense and drop various sized stacks of trays, boxes, containers, cups, and the like onto a conveyor belt for food and product filling. Shapes and sizes include rectangular, square, round, oval, octagon, virtually any shapes available in the food packaging industry. Tray compositions include aluminum, styrofoam, foil, metal, surgical plastic trays, plastic tubs, paperboard, and the like. Each stack is separated by side pneumatics systems and dispenses one to six trays at a time.

“This is a robust solution that can be easily integrated into existing food and product filling lines with speed matching technology, manufactured to increase order fulfillment, reducing downtime and unnecessary costs,” states David McCharles, President of Pineberry Manufacturing Inc. “Our FlexPick Tray Denesting Pick and Place Systems have FDA design features, built with rugged durability for continuous use and long life,” continues Mr. McCharles. “Simple adjustments minimize setup and change over time. Push-button controls and the PLC user-interface make the FlexPick Tray Denesting Pick and Place System easy to use and operate,” concludes Mr. McCharles.

Pineberry Manufacturing Inc.'s FlexPick Tray Denesting Pick and Place Systems use speed matching technology to accurately and positively dispense trays onto an existing conveyor belt. The FlexPick Tray

Denesting Pick and Place Systems offers high speeds and efficiency with the reliability and consistency expected of a major contributor to food packaging automation worldwide. Automating the tray denesting process reduces downtime generated by missing or unseparated trays, and avoids the low speed and high cost of manual denesting. High efficiency combined with simplicity and low maintenance offers quick turnaround times, durability and reliability to load various stack sizes and shapes.

[About PACK EXPO](#)

PACK EXPO International is the largest processing and packaging trade show in the world. Co-located with Healthcare Packaging EXPO, the event features a marketplace of 2,000+ exhibitors displaying processing and packaging equipment and technologies for virtually every vertical market, drawing 30,000+ attendees and offering free educational presentations in several venues on the show floor. Attendees include corporate managers, engineers, sales managers, plant managers, logistics and supply chain managers, manufacturers and production supervisors, brand and marketing managers, quality controllers, purchasers, research/development and package designers from a wide variety of consumer packaged goods companies (CPGs).

[About Pineberry Manufacturing Inc.](#)

Since 1984, Pineberry Manufacturing Inc. has been developing high-quality friction feeding, printing, packaging and custom automation solutions for the plastic card, packaging, distribution, food and beverage, pharmaceutical, graphic arts, and mailing and fulfillment industries. Additionally, Pineberry specializes in integration, working with OEM's and providing customized solutions for the most demanding environments. Whether it is a standardized friction feeder, leaflet feeder, feeding and labeling bags, feeding cookies or an integrated custom solution, Pineberry has the expertise to provide exceptional products to make your project a success.
