Press Release

Pineberry Manufacturing Inc. to Showcase Packaging and Pharmaceutical Serialization Machinery Systems for Erect Cartons in Booth C-3704 at PACK EXPO, Sept. 25 - 27, 2017

Pineberry Manufacturing Inc.'s erect carton serialization systems with modular vacuum conveyor can be added to any end of line process for efficient traceability printing and coding.

Toronto, ON, June 29, 2017 – Pineberry Manufacturing Inc. will be exhibiting PACK EXPO Las Vegas with a CartonTrac EC – Erect Carton Serialization System. The CartonTrac EC produces superior print quality and verifies the print with a tamper proof in-line reader. Cartons are controlled throughout the print window guided for the various print technologies to print with pristine accuracy. The vacuum transport utilizes a fan-based technology dramatically reducing noise level of a single pump or blower. The serialization solution integrates to any production line for further processing within facilities. The serialization and track & trace solution aims to help fight the immense market of counterfeit products and to enhance consumer safety in accordance with legislations, such as the Drug Quality & Security Act (DQSA) and the Drug Supply Chain Security Act (DSCSA).

“This is an inline, robust solution with a small footprint that can be added to any end of line pharmaceutical process,” states David McCharles, President of Pineberry Manufacturing Inc. “Our erect carton serialization system can print in either laser or inkjet marking making it the most flexible solution on the market,” continues Mr. McCharles. “The system is perfect to automate the serialization and track and trace of packages and pharmaceutical packaging, ensuring 100% accuracy,” concludes Mr. McCharles.

Serialization requires a comprehensive system to track & trace the passage of prescription drugs and pharmaceutical products through the entire supply chain. Serialization is able to identify every product's serial number, origin, shelf life and batch number; tracing the products life cycle from production, through

distribution, to patient. With a reliable 1D and/or 2D barcode reader, pharmaceutical products can be verified to ensure 100% accuracy. Pineberry manufactured its pharmaceutical erect carton serialization machinery system with modular vacuum conveyor so it can be installed efficiently to any end of line process. This saves customer's time with installing a proficient serialization and track and trace pharmaceutical machine that meets the requirements of the Drug Quality & Security Act (DQSA) and the Drug Supply Chain Security Act (DSCSA).

About PACK EXPO

PACK EXPO International is the largest processing and packaging trade show in the world. Co-located with Healthcare Packaging EXPO, the event features a marketplace of 2,000+ exhibitors displaying processing and packaging equipment and technologies for virtually every vertical market, drawing 30,000+ attendees and offering free educational presentations in several venues on the show floor. Attendees include corporate managers, engineers, sales managers, plant managers, logistics and supply chain managers, manufacturers and production supervisors, brand and marketing managers, quality controllers, purchasers, research/development and package designers from a wide variety of consumer packaged goods companies (CPGs).

About Pineberry Manufacturing Inc.

Since 1984, Pineberry Manufacturing Inc. has been developing high-quality friction feeding, printing, packaging and custom automation solutions for the plastic card, packaging, distribution, food and beverage, pharmaceutical, graphic arts, and mailing and fulfillment industries. Additionally, Pineberry specializes in integration, working with OEM's and providing customized solutions for the most demanding environments. Whether it is a standardized friction feeder, leaflet feeder, feeding and labeling bags, feeding cookies or an integrated custom solution, Pineberry has the expertise to provide exceptional products to make your project a success.
